DENFIND
STONE

Angus Sandstone at Denfind

Denfind Stone is the sole producer and supplier of Angus sandstone, ensuring a unique and exclusive offering in the market. This distinction underscores Denfind's commitment to preserving the legacy of this unique stone while providing unmatched quality and service.

The company's purpose-built production facility in Angus houses state-of-the-art machinery, enabling the creation of an extensive range of natural stone products that cater to diverse architectural and construction needs.

Denfind's Stone

Our Angus sandstone has a rich history, dating back to the 19th and early 20th centuries when Pitairlie Quarry was a prominent source of this prized natural material. This sandstone was highly sought after for various construction projects across the UK and Europe

**DENFIND

**PITAIRLIE
QUARRY**

Denfind Stone's Angus sandstone boasts one of the lowest greenhouse gas emission counts for dimensional stone, thanks to the quarry's proximity to processing sheds and a commitment to renewable energy and tree planting. Compared to man-made materials, its emissions are minimal, making it a highly eco-friendly choice for businesses looking to reduce scope 3 emissions.

Denfind Stone uses the HES Carbon Calculator to highlight its low carbon footprint, ensuring sustainable methods from quarry to delivery, respecting Angus sandstone's geological heritage

Scotland's heritage is deeply intertwined with the history of whisky and stone. In the 19th century, both **whisky** and **Angus** sandstone were among Scotland's most significant exports, shaping the landscape and the economy.

Whisky, distilled in remote regions and cities alike, became a global icon, while **Angus sandstone**, renowned for its durability and beauty, was used in building projects worldwide.

Today, as we continue to supply **Angus sandstone**, we honour this legacy by contributing to the sustainable and environmentally friendly production of **Scottish whisky**, ensuring these traditions thrive together for future generations.

The Macallan Whisky Distillery

the project

The Macallan Distillery combines modern design with the rich history of the estate. Situated near the historic Easter Elchies House, the entrance features traditional whin stone walls and a grand wrought iron gate with a gilded logo. This stunning entrance is a fitting facade for this state-of-the-art distillery.

our product

Denfind Stone supplied 140mm Angus sandstone, whin pillar caps and copes, and 30-70mm height stone for pillars. Collaborating with architect Paul Hogarth Company and Boyles Stonemasons, our materials enhanced the entrance, blending tradition with the distillery's award-winning design.

The Lagg Distillery Isle of Arran

the project

Located on the Isle of Arran, the Lagg Distillery celebrates the island's whisky-making tradition. Opened in 2019, it focuses on producing peated single malt whisky. The distillery combines modern architectural design with traditional craftsmanship, offering visitors guided tours, tastings, and an insight into the whisky production process.

our product

Denfind Stone supplied low-carbon Angus sandstone. The material, including 140mm guillotined stone and 140mm corners, was integral to the distillery's construction, aligning with architect Denham Benn's vision. Built by main contractor BHC Ltd, our sustainable stone added both aesthetic and environmental value to the project.

DENFIND STONE

Together, let's craft the spirit of Scotland, blending the heritage of stone and whisky for generations to come.
